Mr. Bohon was outside at his residence at the time of the accident. It was very foggy at time, about 8:15 to 8:30 am. It was so foggy that you could hardly see the trees around you. The airplane came over low, it seemed to fly over his house, very close. You could not see the airplane. The engine was running loud...it was not missing or sputtering like he heard someone else report. It was running all the way to impact. He heard two pops....the sounds of it was hitting the trees, then a loud noise when it hit the ground.
