

Preserving the value of wild salmon at the source.

Northline Seafoods is a seafood processing company that freezes wild salmon at the source, starting in Bristol Bay, Alaska. Northline's value-retention processing model creates a high-quality product, provides increased economic opportunities for fishermen, and responsibly utilizes a valuable natural resource.

OUR PROCESSOR

Our floating processor is engineered to capture the maximum value out of each wild salmon that passes over our deck:

- Our fish are frozen on the fishing grounds at ultra-low temperatures
- We freeze fish whole—a streamlined production method that reduces fish time out of the water

- We provide large amounts of slush ice to our fleet, ensuring a consistent cold chain from the fishing net to the freezer

Since we buy directly from the fishermen, our product has unparalleled traceability, including vessel-specific lot codes and temperature log data from the moment the fish leave the water.

Our processor under construction in Sitka, Alaska. Winter 2019.

Northline Seafoods' welding shop Sitka, Alaska.

Closer to completion, our freezer encompasses the majority of our 150-foot barge deck.

Pat Glaab, Chief Executive Officer
(/gallery/2018/11/5/pat-glaab-chief-executive-officer)

Pat Glaab has worked in the Alaska seafood industry for over 35 years. From engineering and plant management to running fishing boats, he brings extensive expertise and a unique understanding of the equipment and processing

ab-chief-

infrastructure needed to produce high-volume, high-quality salmon. In addition to providing executive oversight, Pat leads Northline's construction and processing teams.

SEAFOOD PROCESSOR

Northline Seafoods is seeking reliable, conscientious individuals to work on our floating fish processor this summer in Bristol Bay, Alaska. We have positions available from June through August, with the possibility that high-performing employees will be invited to extend into September. The starting wage is \$15/hour DOE. Email resume and reference list to: [REDACTED] (mailto:[REDACTED])

For more information on this open position, please see the job description below:

Seafood Processor

Job Overview: Northline Seafoods is seeking reliable, conscientious individuals to work on our floating fish processor this summer in Bristol Bay, Alaska. We have positions from June through August, with the possibility that high-performing employees will be invited to extend into September. The starting wage is \$15 / hour, \$22.50 overtime. Up to half of projected hours worked are anticipated as overtime hours.

Who We Are: Northline Seafoods is doing something new: we purchase fresh-caught salmon directly on the fishing grounds, and we flash-freeze it whole to ultra-low temperatures on our processing barge. The result is great fish, a light ecological footprint, and the ability to give our fishers a living income from their work.

Qualifications:

- A strong candidate will be reliable, punctual, and hard-working. We provide on-the-job training, so previous industry experience is not required. Stamina, however, is essential, and a sense of humor is helpful.

Responsibilities and Duties:

- Fish purchasing. Northline processors will be helping our fishers to deliver their fish. This entails assisting boats with tie-up at the barge; logging purchase data into tablets; using cranes to hoist brailer bags from boat holds; sorting salmon at the purchasing line; and assisting with quality tests at the point of purchase.

- quality tests at the point of purchase.
- **Freezing.** Purchased salmon are stored in slush ice tanks until we're ready to freeze them. Our processors will run the fish elevator and pump that move the salmon from the tanks to the pre-freeze room; they will sort salmon onto freezer racks; and they will move the racks into the freezer.
- **Break-Out.** Frozen salmon are "broken out" of their freezer racks and into storage totes. Processors will do the break-out, pack and close totes, and stage the totes for forklift transport to a holding barge.
- **Offload.** Processors will stage totes for transition from the holding barge to our offload vessel.
- **Many Other Things.** We do our own cleaning, basic repairs, laundry, and upkeep. We monitor data on tank capacity and freezer performance. We run with the crew boat to Dillingham for supplies and errands. The best candidates will be willing to learn and pitch in as needed.

Perks:

- *Free food.* Food will be plentiful, hot, and good.

Northline Seafoods | 4690 Sawmill Creek Road, Sitka, Alaska 99835 | 

- *Free housing.* Each processor will have accommodations on the barge, most (but likely not all) in single rooms.
- *Free round-trip airfare* between your home city and Bristol Bay.
- *Stories* that are going to be more interesting than those that come with ordinary jobs.

Realities (a very incomplete list):

- *Hard work.* You'll be doing strenuous, and often wet, physical labor.
- *Cold.* You'll be moving fish into and out of freezers.
- *Bad internet.* Our satellite-based connection is plodding at best.
- *Dodgy weather.* Summer in Alaska can be more "Alaska" than "summer."

Requirements:

- Must be 18 years of age.
- Must provide proper documentation for employment authorization in the United States.
- Must be able to work long hours, standing for periods at a time, and regularly lift and move objects of up to 50 lbs.
- Must speak and understand basic English, for safety purposes.

How to Apply: Please send a resume and reference list to info@northlineseafoods.com, or drop them off in person at 4690 Sawmill Creek Road, Sitka, AK 99835.
