Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

There is a minor dent on the landing gear strut. Left side stabilator is substantially damaged and bent in upward direction. Elevator has some minor cracks on the skin along with stress and rubs against the trailing edge of the stabilator when moved up and down.

Taxiway signed was destroyed and completely uprooted from its footing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed for my cross country flight from KCCR at 8:36am PST. I flew to KRDD and then to KGOO and returned back to KCCR around 11:30am PST. As I was arriving to KCCR I requested touch and go's with KCCR tower and they cleared me for runway 1R. On the first landing I landed long and took almost all the runway available so I exited the runway and requested to taxi back for takeoff. KCCR ground instructed me to taxi to runway 1R for takeoff. I did a normal takeoff from runway 1R and flew right hand traffic pattern. KCCR tower cleared me for touch and go on runway 1R, when I came for landing I started floating and drifting to the left of the runway centerline and I felt that landing cannot be made safely so I decided to go-around, I added full power and as I was going around I felt that some part of my aircraft hit something but I was already airborne and the aircraft was climbing at a normal rate. As I got to the right downwind KCCR tower told me to make a full-stop landing. I safely made this landing to a full-stop and after exiting the runway KCCR ground instructed me to taxi back to the flight school.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The pilot will be required remedial training in the following areas of operations:

Stabilized Approach Concept

Aeronautical Decision Making (when, how and why to go around)

Go-Around Procedure

Review Normal & Short Field Takeoffs and Landings

Risk Management related above areas of operations
