Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

plexiglass canopies shattered ; main wheel housing cracked ; empanage detached from fuselage .

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My second flight of that day in this glider began to launch at about 1513 PDT Friday 8 April 2022. The intent was to return to home field after the flight . At about 2200 feet AGL I released from the tow in the vicinity of Bob’ s Gap and began to climb a thermal to an altitude of about 9000 feet MSL.

Next I turned south toward the ‘second ridge’ and the work camp where I was sustaining an altitude around 8000 MSL. I crossed Fenner Canyon flying south toward the mountains and turned west to follow the terrain mostly maintaining altitude and gaining a bit. When I reached an ascending ridgeline I turned south to follow that ridgeline flying at about 55 kts IAS steadily indicating 4 kts lift . Before reaching the top of the mountain the lift diminished at which point I turned right to gain distance from the terrain and encountered sink of about 6 kts . I increased bank to head toward better terrain clearance. At that moment my right wing tip made contact with one of the pinion trees spinning the glider to the right . I heard a second impact noise which I believe was another tree , the descent to the ground followed almost instantly. The terrain was very steep and the glider slid down hill until stopped by two pinion trees. The flight terminated at about 1610 PDT.

I sustained no injury during this event .

Given the elevation and time of day I chose to not stay with the glider but to make my way to lower elevation and less snow .

Just short of 1900 PDT I reached the Angeles Crest Highway at a viewpoint where I could see the terrain between me and the airfield (46CN) . With night approaching I chose to not enter the difficult terrain to the north but chose to follow the highway toward lower elevation and less snow .

After walking for several hours I did at about 2230 PDT get help from a motorist who was in the area with the intent of camping . A call to 911 was not possible as there was no cell service available. This ‘good samaritan’ drove me home where I arrived at about 0030 PDT Saturday 9 April 2022. I notified the airport staff by e-mail at about 0050 PDT who then took appropriate action to cancel planned rescue efforts.

After a few hours of sleep I returned to the airfield to make the required notifications .
