Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft damage: propeller, right gear leg pulled out of fuselage, right wing, elevator, stabilizer, bottom of fuselage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We departed CNY Canyonlands strip that morning. We flew over the arches, and bridges in Canyonlands Park. The winds at the field that we were going to land at were bad, so we went on to UT03 Hite and landed around 12:30 pm with strong winds. We intended to spend the night, but saw the signs saying 'no camping,' so we waited for the winds to calm to take off. At about 6:30 pm there was a 5 nt crosswind with occasional gusts at 170. I was departing to the west. The airstrip has a lefthand dogleg and a down hill after about 200 feet. I was on take-off when it felt like I was hit with turbulent air. When the tail came up I lost directional control and the aircraft veered to the right and went off of the narrow runway onto the rocks beside it. I could not regain control and spun around to the right. The right gear leg came off, the plane fell onto the right wing and slid to a stop.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Leaving the tail down longer might have prevented the loss of directional control
