**Description of Damage to Aircraft and Other Property** *(Use additional sheet if necessary)*

N8885X  
 Totaled: Wings and part of cabin top, left gear leg and casting separated from fuselage.  
 The remainder of the fuselage spun around, separating the tailboom, except for some control cables and one power cable.  
 The remainder of cabin and engine rested on the right side on the ground next to a tree.  
 See pictures.

**NARRATIVE HISTORY OF FLIGHT** *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Incident involving 8885X on 6 September 2020  
 Flight planned from Livingston, Montana KLVM to Coeur d' Alene, Idaho KCOE.  
 Flight route through valleys; south of TFR' s, via Bozeman, Billings, south of Missoula, follow I90 then direct to KCOE. Planned cruise altitude was 6,500. Evening takeoff due to high density altitude at field. Preflight completed and 44 Gallons of fuel onboard. Standard fuel burn from previous flights during the summer has been 10.5-11 GPH, at normal cruise >7,000ft and 2200 RPM, MAP 20-22. Planned flight was 2:58 minutes, with a planned fuel burn of 32.5 Gallons. Departure normal, as headwinds were greater with altitude planned altitude was ~6,500 knowing I would have to climb occasionally for terrain, crossing from valley to valley.  
 Power settings in flight were adjusted to fight headwinds RPM set to 2300 RPM. MAP was in the 22-23 range. Leaning I thought was normal, EGT' s from 1120-1230 across the cylinders, as I recall. I made altitude changes enroute and leaned and richened mixture across route.  
 ~15 Miles from KCOE over Hayden Lake make first radio call and winds were out of 25, one other plane was inbound and also setup for a planned straight in approach on 24. Over middle of Hayden Lake at ~5,500' engine lost power. Pitched for best glide ~80 MPH. Performed engine out troubleshooting, increase mixture, waggle wings, carb heat, varied power settings. Accepted engine power return was not likely, determined that I could make it over English Point on Hayden Lake and setup for a forced landing, with the intent of landing on Lancaster Road as it was in direction of travel. Could not locate Lancaster Road in the dark. Trees were illuminated and I made an aggressive left turn to dodge 3 trees illuminated, followed immediately by hard right turn with full aft stick to not directly hit a tree to the left of the first 3. Lost illumination on impact. After landing, quickly got out of plane. Located nearest light source, walked to it and sought help.

**RECOMMENDATION (How could this accident/incident have been prevented?)**

Operator/Owner Safety Recommendation

**MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)**Was there Mechanical Malfunction/Failure?  Yes  No
