Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to prop, cowling, strut, rudder, right wing

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I planed to take the aircraft down to my mechanic for some safty upgrades. I started the day by traveling to the airport. Upon arival around 8:40 I located my instructor for clearance to solo down to 77S. After I recieved clearance from my instructor I began my preflight inspections. I recieved cleance for take off around 1735Z. I flew direct to 77S enroute I recieved weather information for the AWOS at 77S. I continued directly to 77S entering a left down wind for runway 34. upon landing I taxied to my mechanics hanger and shut down. when I check my phone I noticed that my mechanic had left a message that he had to leave and was going to be around 40 minutes. I decided to get in some touch and goes and got back in the air plane. I procede back to the main taxiway and decided to use runway 16 using the windsock as an indicator. I annouced my intentions on 122.7 and proceded to run closed traffic. after my 3rd touch and go I decided to return and wait for my mechanic. On my final landing I was doing a full stop and gave too much left brake when slowing causing me to vere to the left and off the runway into soft ground at which point the tail lifted to the point that it went over the top and ending with a prop strike and the airplane inverted on the ground.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

by applying more even pressure to both brakes while slowing.
