## Union Pacific Derailment Fire/Command Vehicle Fire

E-4 was first on to the scene of a reported commercial structure fire, which was discovered to be a fire involving derailed UP train cars carrying ethanol. Approximately 20 train cars were involved in a derailment on April 24, 2019 at 0030 between Yuma and Mansfield Hwy. Access to the incident site was difficult due to heavy rain, mud and terrain. The cars were also spilling burning product into Sycamore Creek. Battalion 1 took command and declared a Level 3 Hazmat due to the amount of ethanol involved and the potential impact on the surrounding neighborhoods and environment. Environmental Services was notified and responded as well as TCEQ, EOC and E-staff. Squad 2 responded and Support 2 was asked to deliver the foam trailer. The incident was divided into divisions based on geographical boundaries divided by the 2 sets of train tracks. An evacuation group was designated to protect nearby residents consisting of Q-17, E-14, T-bus, and Red Cross. Despite the proximity of the burning railcars, no residents opted to leave and none were forced. A large horse barn burned when exposed to the train car fire and a horse was killed. No other injuries were reported. Q-42 Brush 42, E22 and Brush 22 were assigned as the South Division near Atkins Road. South Division provided reconnaissance and mitigation for areas south of the railcar fire. The Shift Commander and Safety 1 assisted with the command functions. The SC assumed the role of IC and B-1 remained in the role of Operations. Safety 1 and the shift tech assisted with product identification and site control. The command vehicle was delivered and set up to facilitate a growing and complex command structure. Unfortunately, due to low visibility and unpredictable powerline placement, the camera boom was raised into the high voltage lines overhead. The unit became energized and untenable. I was shocked slightly upon attempting to enter the command vehicle. The unit was evacuated and all personnel and vehicles were removed from the vicinity. Oncor was dispatched with high priority to de-energize the lines contacting the command vehicle. Safety considerations prevented the mitigation of issues involving the Command Vehicle and it caught fire and burned. Chief Davis and the PIO made the scene and assisted command with media and railroad relations.
