Good morning,

You are correct. N5757C was not equipped with the fuel warning light annunciator.

Justin

Subject: CEN25LA051 (N5757C, Cessna 340A @ Muskogee, OK) - Airframe Fuel System Question

Good evening sir,

I hope you are doing well.

I have a question please about N5757C.

My understanding is that N5757C does not have the optional fuel low level warning lights installed in it? Is that correct?

FUEL LOW LEVEL WARNING LIGHTS

The optional fuel low level warning lights, see Figure 7-3, provide a warning when the left and/or right main tanks contain approximately 60 pounds of fuel. The warning is provided by the L FUEL LOW and R FUEL LOW lights located on the annunciator panel. These lights are actuated by a float switch located in each main fuel tank. Each light operates independently from the fuel quantity indicating system.

Thank you.

Mike
