

On Tuesday May 7, 2019 I, Cody Oxner  
witnessed the Bellanca Citabria take  
off from the airstrip and prepare to  
take off to the north. The airplane broke  
ground and went approximately another 500 feet  
before pulling up and preparing to make a turn  
back to the south. The airplane then appeared  
to stall out at approximately 100 feet  
~~agl~~ agl and made a dive into the ground.
