

Factual Report – Attachment 2
Flight Track Graphics

AIR TRAFFIC CONTROL

DCA19MA143

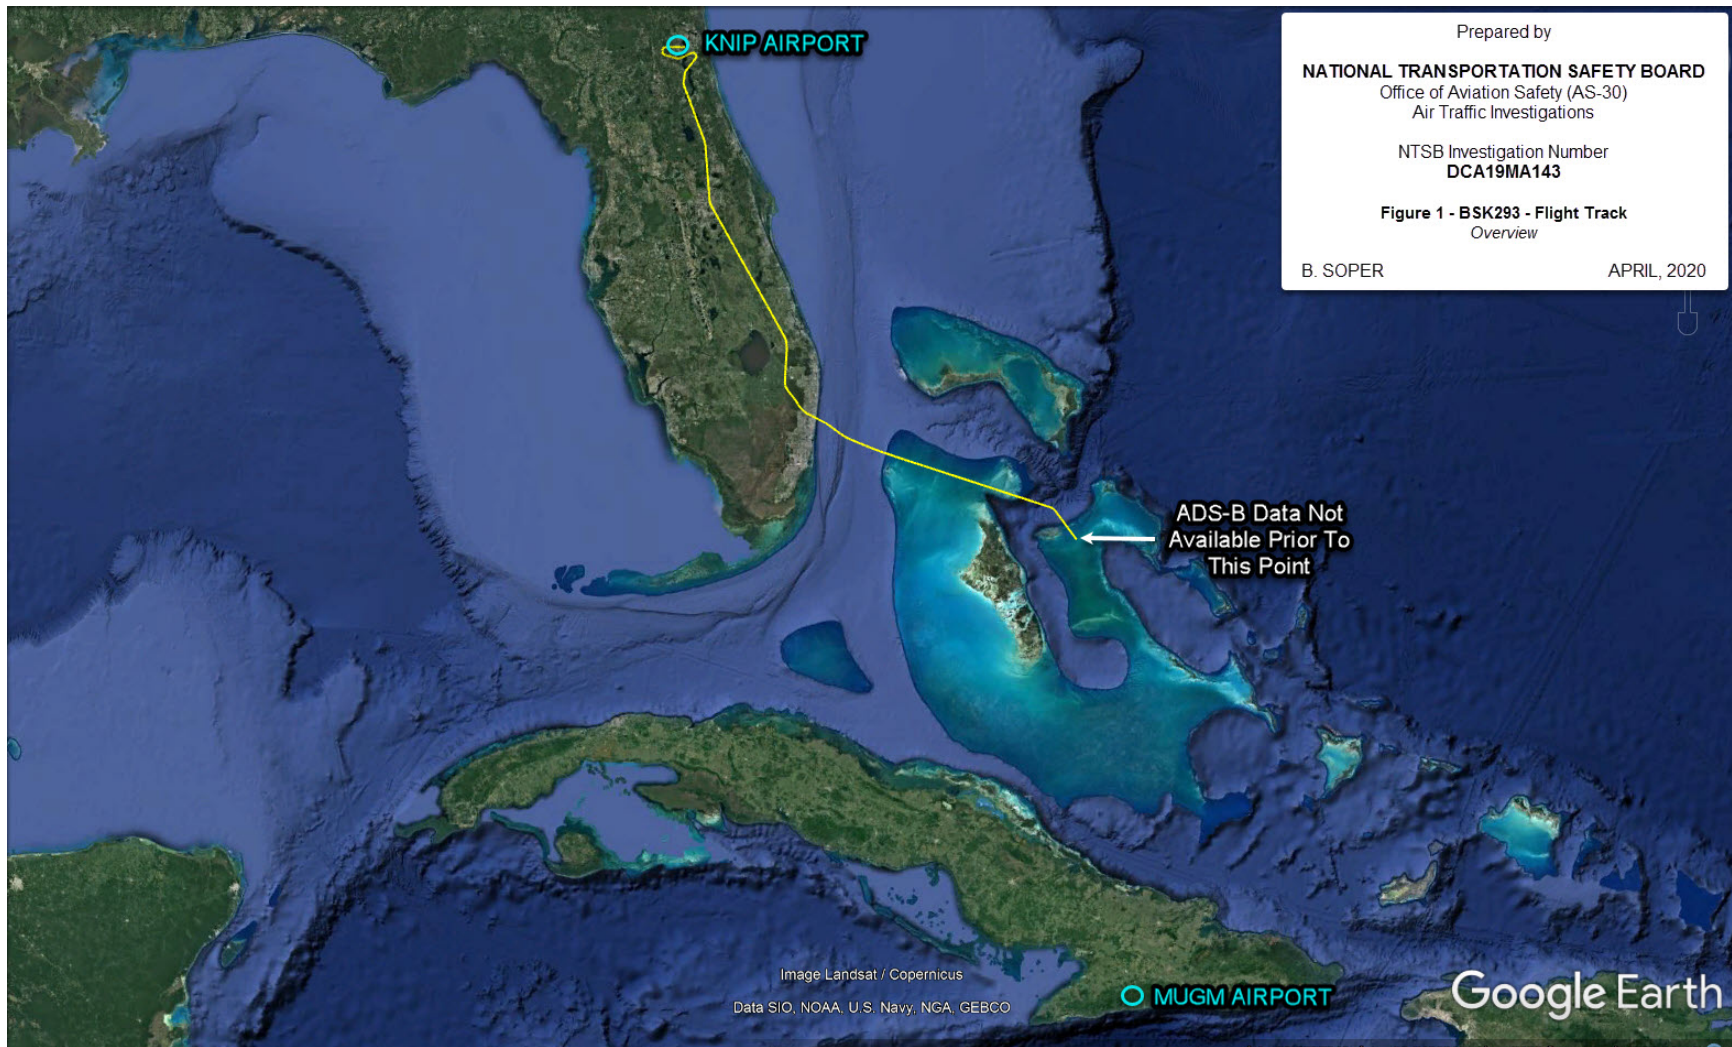

Figure 1 - Overview of flight track from the portion of the flight track that was recorded by ADS-B data provided by the FAA. The destination airport and point at which ADS-B data began is depicted.

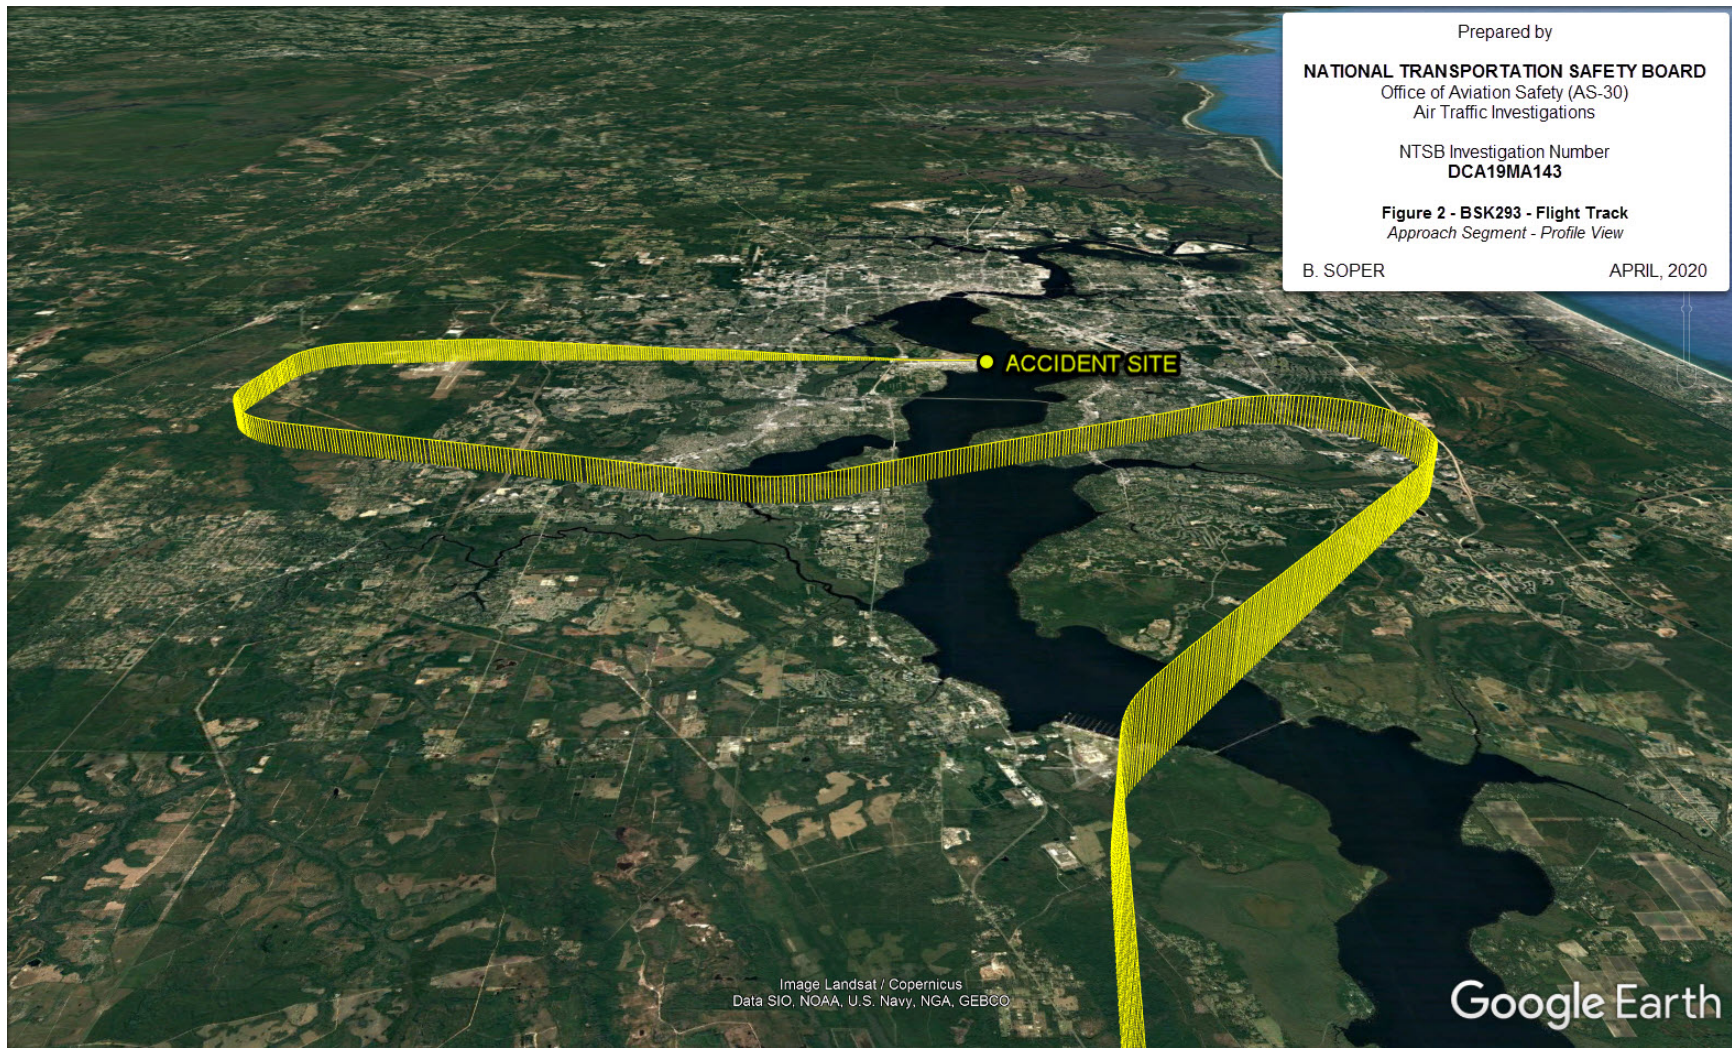

Figure 2 - Profile view of final portion of flight track rendered over satellite imagery in Google Earth. The accident site is depicted for reference.

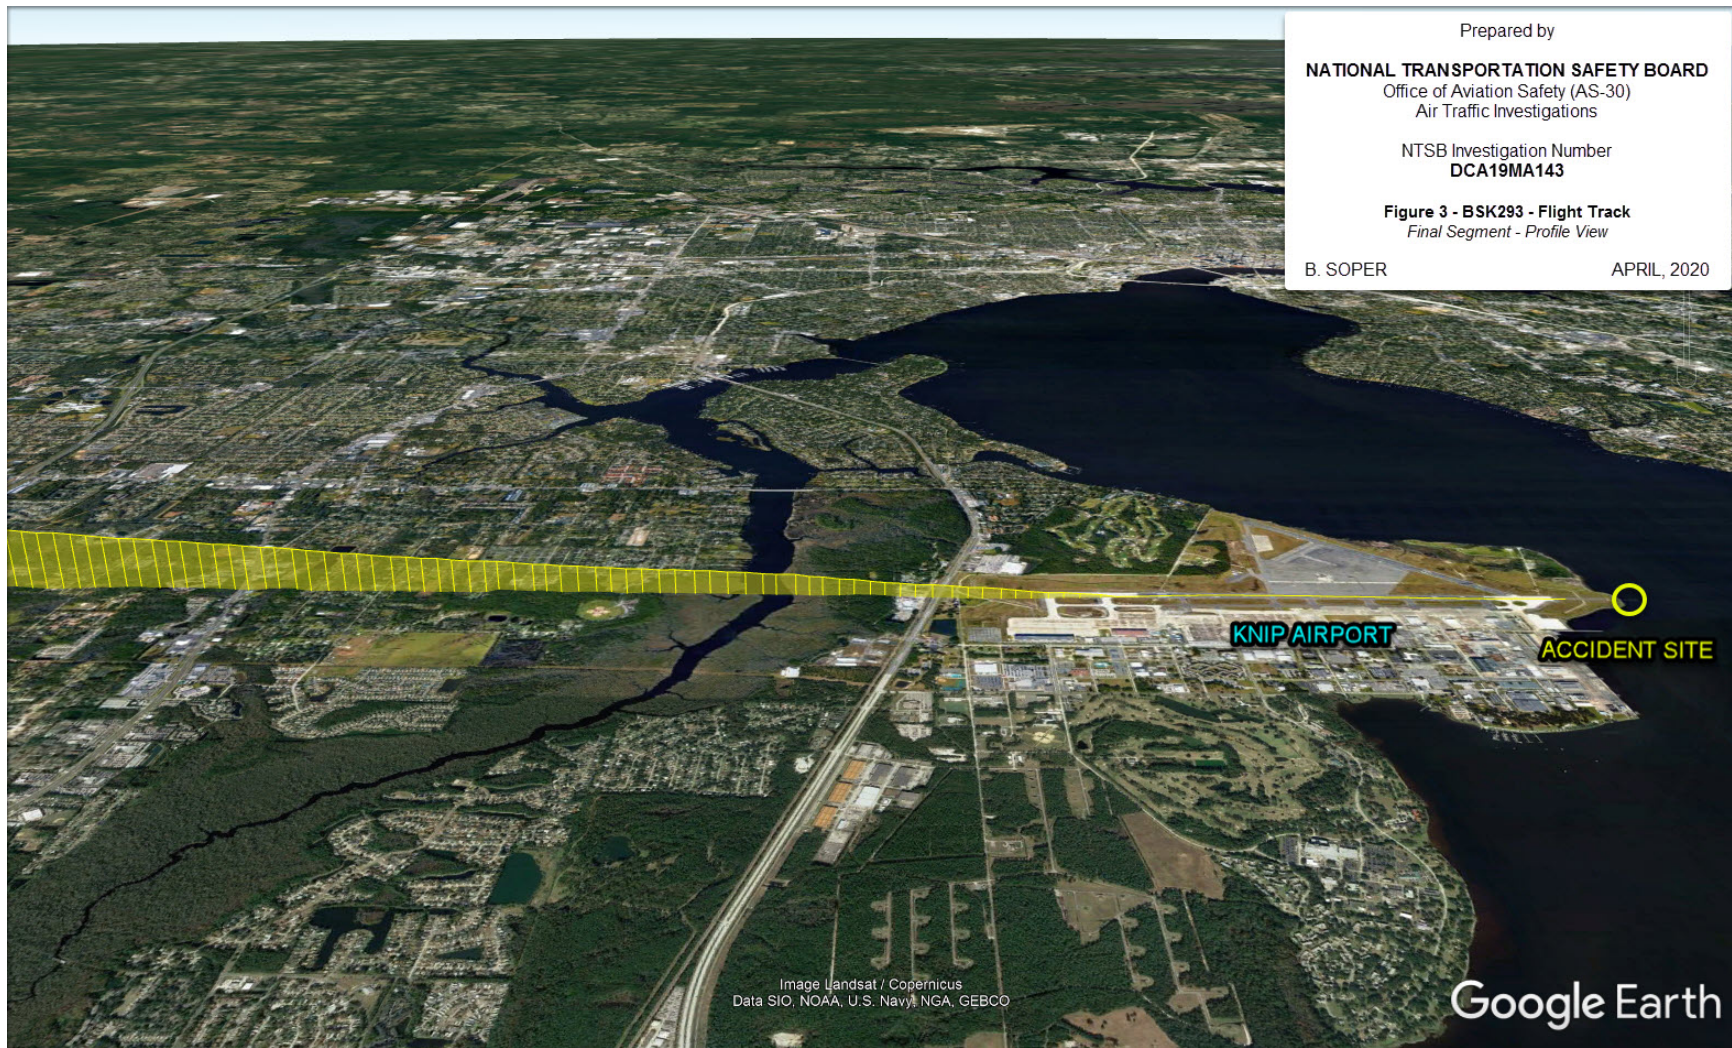

Figure 3 - Profile view of flight track for the final approach segment with destination airport and accident site depicted.

Figure 4 - Overhead view of final segment of accident flight track with time, altitude, and ground speed data depicted for reference.

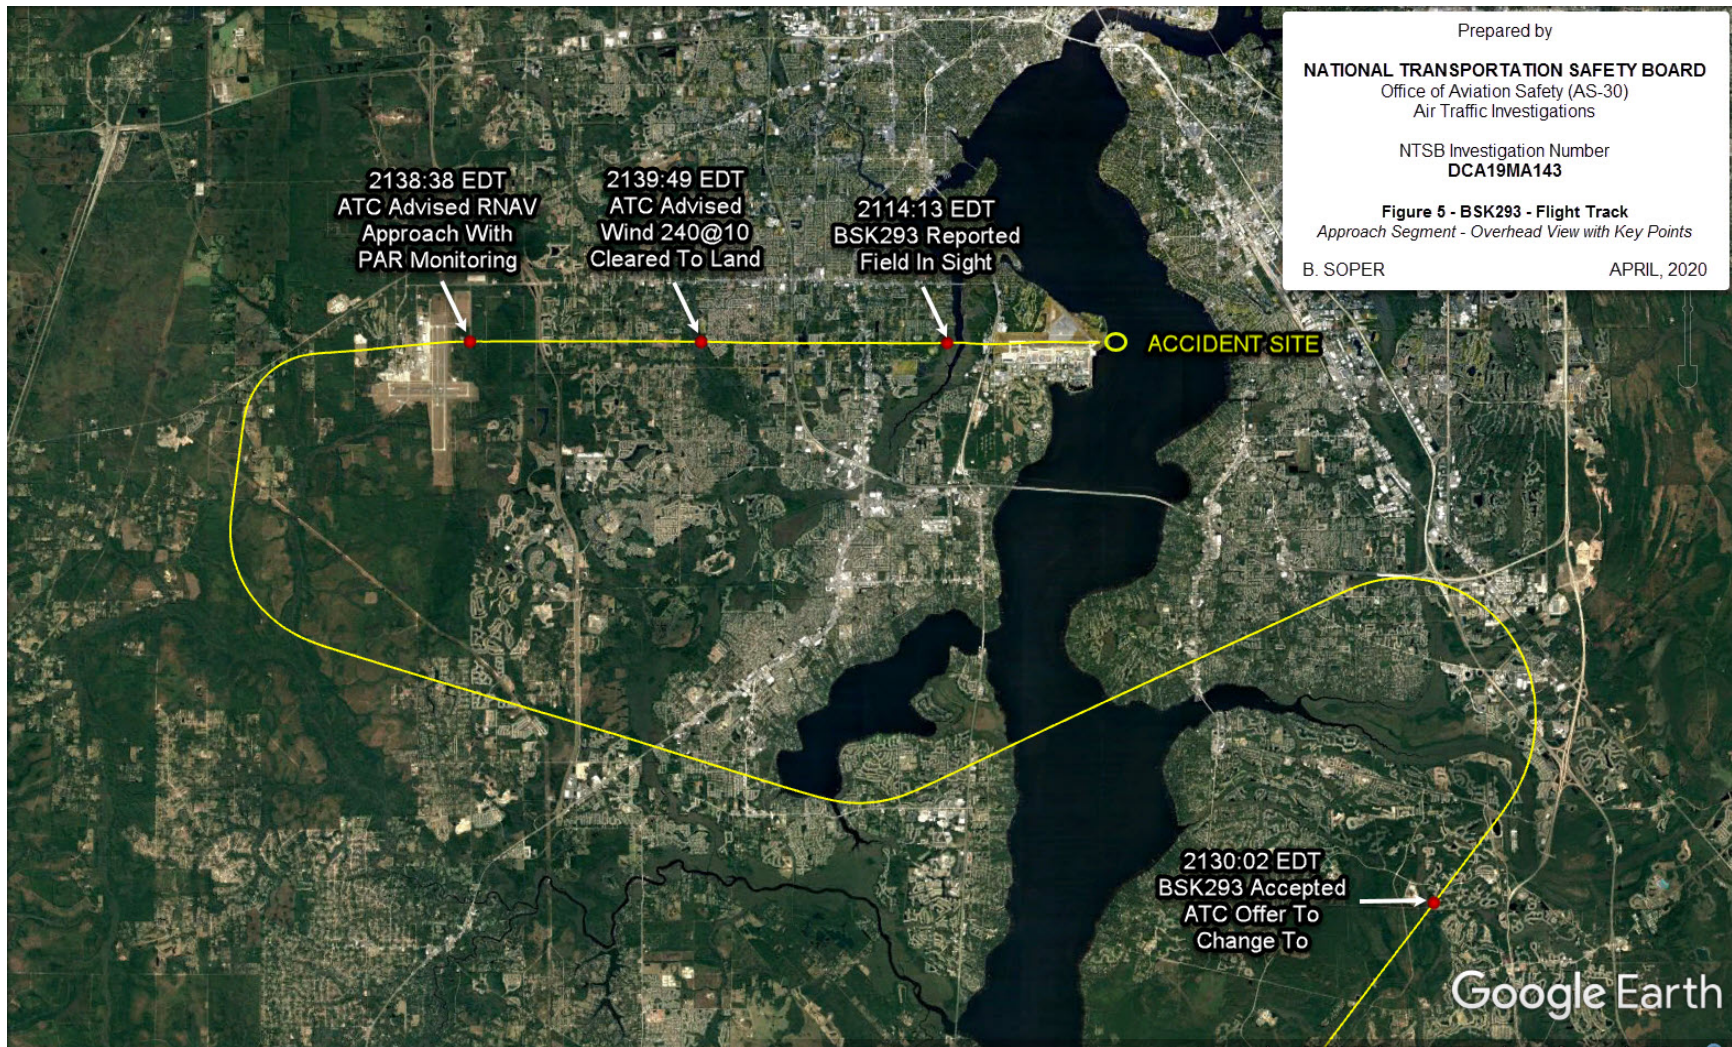

Figure 5 - Overhead view of final segment of accident flight track with key points along route of flight from the pilots decision to change to runway 10, through the point the pilot reported the field in sight on final approach.
