

Lynn Spencer  
Air Safety Investigator  
Aviation Safety / Eastern Region

**Date:** October 12, 2023

**Subject:** ERA23LA374 Memorandum for Record

**Contact:** FAA Inspector Michael Mantione, Rochester FSDO

The following are excerpts from e-mail correspondences received from Inspector Mantione on October 3, 2023:

"...we had the opportunity to inspect the aircraft, capturing additional photographs of the wheels and brakes. Furthermore, we conducted a comprehensive review of the aircraft's maintenance history, with a specific focus on any records related to brake maintenance. The only reference to brake-related work in the records dates back to 2007 when the brake assemblies were replaced. Subsequently, brake pads were also replaced.

"... I am collaborating with the Type Certificate holder, Regal Air Inc, located in Fort Collins, Colorado . . . to confirm that the correct brakes are indeed installed on the aircraft."

"I've received an email from Cleveland Brakes confirming that the correct brakes are indeed installed on the aircraft."
