---

Ryan,

Per our phone conversation this morning here is a synopsis of the Echo Lake Park property maintenance question, Echo Lake Park property was officially conveyed to the City of Fort Worth by Tarrant County on April 3, 2017; with several conditions outlined in Section 4 of the agreement (attached). The City took over operation and maintenance of the park and lake on October 1, 2017. One of the conditions of the agreement was that the County would be responsible for all maintenance and drainage issues associated with the drainage in Southeast corner of the site. The County has been working with the railroad and TCEQ for plan/design approval and subsequent contractor selection and award; we believe they are close to commencement of this construction project.

I have attached a copy of the agreement and construction site plan for County drainage improvement work. Please let me know if you require additional information.

Thank you,

**Scott E. Penn, District Superintendent**
