

Track Standards Working Group Update

- Task No. 19-04 (Track Geometry)
 - Evaluate current geometry thresholds
 - Standardize terminology
 - Study combination geometry defects
- Currently FRA and Volpe are continuing to run simulations exploring multiple combinations of different track geometry parameters

RSAC Track Safety Standards Working Group

Track Standards Working Group Update

- Task No. 19-05 (Track Inspection)
 - Examine current track inspection practices
 - Analyze data from automated track inspection (ATI) test programs
 - Determine if and how to best incorporate ATI into existing regulatory framework
- Currently working group is discussing a unified and common approach based on the data gathered from all test programs
- Four unfinished test programs extended until November 2022 to finish collecting data
