Addendum to Medical Factual Report

January 23, 2024

A. CRASH INFORMATION

NTSB ID: HWY22FH008
Location: Tishomingo, Oklahoma
Date: March 22, 2022
Time: About 1219 local time

B. MEDICAL SPECIALIST (ADDENDUM)

Specialist Turan Kayagil, MD, FACEP
National Transportation Safety Board
Washington, DC

C. DETAILS OF ADDENDUM

1.0 Description

This addendum supplements the Medical Factual Report dated February 14, 2023 (in the docket for this investigation), with results from the truck driver's United States Department of Transportation (DOT) post-accident drug testing. The additional documents reviewed for this addendum were a Medical Review Officer (MRO) report and associated Federal Drug Testing Custody and Control Form. According to the National Transportation Safety Board motor carrier investigator, the truck driver did not undergo DOT post-accident alcohol testing.

2.0 Factual Addendum

A urine specimen was collected from the truck driver at 0819 on March 24, 2022 (2 days after the crash date) for DOT post-accident drug testing. The MRO verified the results of this testing as negative for all tested-for substances.¹

¹ Tested-for substances on DOT urine drug testing are marijuana metabolites, cocaine metabolites, amphetamines, opioids, and phencyclidine (PCP), in accordance with [49 Code of Federal Regulations § 40.82](#), as detailed at [49 Code of Federal Regulations § 40.85](#).
