Interview Summary

Person Interviewed by Telephone: [REDACTED], Husband of SUV driver

Date and Time: March 11, 2020 1:30 p.m. CDT

Summary:

Mr [REDACTED] confirmed his wifes cell phone number and indicated she always connected it to her vehicle's entertainment system so she could communicate hands free while driving. He went on to say that she had experienced a seizure while driving back in 2006, and, she had stopped driving for six months after the crash as recommended by her doctor. He added that her doctor never reported the incident to the DMV, so she never had her license suspended for medical reasons. He stated that her seizures were under control and shed had not experienced any seizures in quite some time. He provided me the name of a school official, Ms. Carol Brooks, at the school where his wife worked so I could conduct additional interviews.
