RE: N90LK

Previous exam files: WPR19FA124; Feather Lab Case #190508.35

Dear Mr. Cawthra,

On 2 February 2021 an additional feather sample (190508.35.2) was received for this case. The feathers have been identified as Green-winged Teal (*Anas carolinensis*). These bird remains are the same species as was identified for this case in a letter to Michael Huhn on 20 May 2019 from a sample taken from the victim's clothing.

Good luck with your investigation, if you have any further questions please let us know.

Sincerely,

[REDACTED]
