Subject: RE: [EXTERNAL] NTSB Information Requests 3/12/22

Date: Saturday, March 12, 2022 1:58:27 PM

Attachments: [Historical Pressures.xlsx](#)

Kurt,

We only have data back until 3/6/2018. Attached is what we have available. The MOP at the transmitter is 886 psig and I've only included pressures above MOP. All of these pressures are DOT Pressure Transmitter checks. It doesn't appear we have any exceedances of MOP during normal operations. The transmitters are only spanned to 1500psi. The pipeline never sees this pressure because the pressure is added between an isolation valve and the transmitter.

Date/Time	Pressure
03/23/2018 16:28:50	1500.000
04/11/2018 10:44:57	1008.000
04/11/2018 10:45:00	1008.000
04/11/2018 10:45:02	1500.000
04/11/2018 10:45:07	1271.000
04/11/2018 10:45:12	1396.000
04/11/2018 10:45:17	1498.000
04/11/2018 10:45:22	1471.000
03/19/2019 09:00:54	1325.000
