

Dan Baker
Senior Air Safety Investigator
AS-WPR

Date: October 12, 2023
Subject: WPR22FA266, Van's Aircraft Airspeed Limitations
Contact: N/A

The following chart depicting airspeed indicator markings was retrieved from the Van's Aircraft company website ([Airspeed indicator markings by model - Van's Aircraft Total Performance RV Kit Planes \(vansaircraft.com\)](https://www.vansaircraft.com/aircraft/aircraft-performance/aircraft-performance-rv-kit-planes)) on this date. The chart specifies the Red Line (never exceed speed) for RV-9 model airplanes is 210 mph (true and indicated).

AIRSPPEED INDICATOR MARKINGS						
All speeds in statute mph						
	<i>RV-4</i>	<i>RV-6/6A</i>	<i>RV-7/7A</i>	<i>RV-8/8A</i>	<i>RV-9/9A</i>	<i>RV-10</i>
Bottom of White Arc (approximate indicated stall speed with full flaps)	54	55	58	58	49	60
Top of White Arc (maximum speed with full flaps)	100	100	100	100	90	100
Bottom of Green Arc (approximate indicated stall speed without flaps)	58	59	64	64	56	70
Blue Line (Maneuvering speed. Maximum speed at which full control can be applied. Speed at which full elevator control would impose loads exceeding limits)	134	134	142	142	118	144
Yellow Arc (caution range, to be flown only in calm or light turbulence conditions)	180-210	180-210	193-230	193-230	180-210	180-230
Red Line (never exceed speed - true and indicated)	210	210	230	230	210	230

NOTE: For RV-14 V-speeds, please refer to the [chart on the Van's Aircraft website](#). For RV-12/12iS speeds, please refer to the POH for the aircraft.
