Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

tailboom slice about 8in accross

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On a training flight in pursuit of his private pilot helicopter. We took off from O38 with the intent to practice autos and off airport landings. We were conducting autorotation practice at ok15. The student flared to high, I took the controls in an effort to cushion the landing. Prior to ground contact I utilized the rotor RPM to cushion the landing as much as possible. I elected to not reengage the rotor as there are several publications from the factory warning that engagement of the engine at low rotor RPM creates an undesirable yaw. On ground contact the aircraft was level at very low airspeed. We shut down at ok15 as we did not know if the aircraft was damaged. Initial visual post flight walk around showed we had skidded about 15feet and that the tail boom had been damaged.
