Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop struck runway, curled ends of prop, nose landing gear pushed firewall back.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 3.15.22 I Jearmy McCubbins completed 3 take off and landings from Moberly airport along with my flight instructor. The day prior we completed 15. At that time, he said I think you' re ready to go if you feel comfortable and I agreed. We did the necessary logbook work/endorsements etc. and then I took off and did another 3 take off and landings solo. That all went well so I taxied over and we discussed a few things. After that, I took off again for a short flight to the west and then back to Moberly airport.

As I was coming in everything fell great. I first touched the ground and the plane bounced a little, touched back down, bounced a little more, I give it a little power added, then touched down on the front wheel first then rested on all 3. At that time I had no indication the prop had struck the runway. I taxied over to the hanger. Once I exited the aircraft, I noticed the prop had a small curl on the end of each blade. Then I realized what happened. I stored the plane back into the hanger then contacted my instructor.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

After the first bounce, full power and go around.
