

Hi, My name is Jake Boney and I'm a 29 year old pilot.

On the morning of September 2, 2020, I sprayed a 30 acre field of cotton traveling North & South due to the blinding from the sun of my previous load.

The plane was running as it should as I continued my normal routine. As I finished, my next field was to the east as I don't recall anything after that point.

Thanks,
