

RECORD OF CONVERSATION

Aaron M. Sauer
Senior Air Safety Investigator
Central Region

Date: 09/19/2022
Person Contacted: Witness – Stephanie Pulley
RE: CEN22LA395

Narrative:

According to Ms. Pulley, she and her husband were fishing near the accident site. Prior to observing the airplane impact the power line, she stated the airplane was flying low along water at an altitude of about tree top level. She stated the engine was running fine with no issues or strange sounds. She observed the airplane for about 10 seconds before it impacted the power line and water. Once the airplane impacted the water, she and her husband responded to the airplane accident to assist with the pilot and passenger. They assisted the airplane occupants into their boat and transported them to a nearby boat launch. She stated that neither the pilot nor passenger reported what happened but they seemed to be in shock.
