

RECORD OF EMAIL

Samantha Link
Aviation Accident Investigator
Western Pacific Region

Date: April 27, 2020
Person Contacted: Ms. Christy Hileman - Federal Aviation Administration (FAA) Civil
Aerospace Medical Institute
NTSB Accident Number: WPR20LA130

Narrative:

During an email conversation with Ms. Hileman she reported that she contacted the Maricopa County Medical Examiner to check on the status of the autopsy and FAA toxicology box for the fatally injured pilot. They replied stating that, over the weekend, they attempted to contact the local FAA Flight Standards District Office but did not receive a response. Therefore, they did not complete an FAA toxicology box, and only an external autopsy was completed on the pilot. The Medical Examiner mentioned that they will send us their local toxicology report once it is finished.

END.
