Performed 100 hour/Annual airframe inspection IAW Robinson MM Section 2.400 and Appendix D to CFR part 43, see checklist on file for details of inspection. Installed new C771-2 air filter. Drained and flushed TRGB with oil A257-2. Cleaned and tested MRGB/TRGB chip detectors. Touched up paint on MR blade tip caps, TR blade tips, lower LH and RH frames. Performed sheave alignment check and adjusted to L/H .090, R/H .070. Replaced hydraulic filter AN6235-1A and serviced reservoir with MIL-5606 fluid. Removed engine fan reference RMM Sec 6.210 and replaced starter ring gear 72566. Installed fan and balanced to .13ips @ 1:00 IAW RMM Sec 6.220-6.240. Complied with the following SB's and SL's: SB96 D602-1 Time Delay Assembly N/A due to lot number installed, SB97 R44 II Induction Hose N/A due to part number installed, SB98B Air/Oil Separator Hose Spring N/A part not installed, SL61A A185 Brackets Installation & Fiberglass Scroll Repair per instructions. All SB's now current through SB-98B. Performed ELT test per 14 CFR 91.207(d). Inspected and weighed fire extinguisher, weight within limits. AD's checked and current through 2019-10. I certify that this airframe has been inspected IAW a 100 hour inspection and was determined to be in airworthy condition. Airframe returned to service this date and time.

Annual inspection performed IAW RHC M/M check list. Inspected and cleaned gascolator, Drain and flushed both main rotor & tail rotor gearbox's and cleaned and tested chip detectors. Serviced Main and Tail rotor gearbox with A257-2 gear oil. Drain and flush clutch. Installed new air filter CA6525. Installed new Hydraulic filter AN6235-1A. AD 2022-12-08, issued 6/29/2022 with no amendments completed, N/A by serial #. AD 2022-19-12, issued 10/20/2022 with no amendments completed, N/A by ser # of T/R Blades. ELT battery out of date expired 3/2021, removed ELT battery and replaced with new Ser# TM0000275194 new expiration date is 9/2029. ELT tested with no faults noted. Found fan wheel rubbing on lip seal top and bottom, upon further inspection found that the fan wheel had been installed incorrectly and not properly torqued. Removed nut from fan assy and the fan came off with no effort. Further inspection revealed excessive corrosion on the lower shaft assy. Removed lower shaft and replaced with new C181-3 bearing and shaft Ser # 12229. Replaced lip seals with new, replaced fan nut, pin and washers with new. Balanced fan to .09 ips. I certify this rotorcraft has been inspected IAW Annual inspection and was found to be in an airworthy condition and is approved for return to service.
