The following is a summary of a conversation that occurred with the above-named individual:

- Mr. Dickson stated that the airplane had been based at Concord (JQF), and that is where he departed from before he did some landings at both 28A and EQY.
- He was returning to his farm and performed both high and low “recon flights” over the field before landing.
- The landing was uneventful until he hit some taller weeds and the airplane nosed over.
- He said he had not expected the weeds to be so high, and he learned some lessons.
- He reported no preimpact anomalies or malfunctions with the airplane.
