

Flight: May 19, 2022

Airport: KGWB, DeKalb County Auburn, Indiana

Lift off time approximately 10:45

Runway 27

Airplane: Cessna N2128E

Date: June 10, 2022

To: Ryan Teilhaber

Email: [REDACTED]

As I recall, after doing some flight maneuver's i.e., turns, climbs, descents and slow flight, we returned to the airport from the SSW into the pattern approximately 1 mile south of the airport. We made a total of 4 approaches, 2 touch and goes and 1 go around, each with full 30-degree flaps. The last approach to runway 27 I was lined up slightly right of center and then corrected back but ended up slightly left of center as I entered the runway threshold. I cut power to idle at this point while still correcting center alignment. I continued the descent to level off and then started to flare but was still not centered. I was instructed to go around but was too low and too slow to make a safe coordinated take off. I landed the plane on the runway then rolled off onto the grass to the SSW approximately 50 to 60 feet. I was instructed to shut down the engine and leave the plane where it was. We exited the plane to look at the main landing gear for any damage.
