RE: Hazardous Liquids Pipeline Release  
Edwardsville, Illinois  
March 11, 2022  
NTSB No. PLD22FR002

Dear Edwardsville, Illinois Investigative Party Coordinators:

The Technical Review for the Environmental Response Group Chair's Factual Report of the subject investigation was held by email. We have reviewed all factual party comments on the draft factual reports and decided on a disposition for each one, as summarized below.

Section C, corrected first sentence of second paragraph to read as follows, "The released crude oil flowed from the breached pipeline north to the creek's south bank and entered the creek, and also flowed south to a contained wooded wetland."

Section D.3, deleted information in the second paragraph that is subject to confirmation during pending work by the Metallurgical Group.

All editorial suggestions and corrections have been considered and incorporated as appropriate.

Sincerely,

Sara Lyons  
Investigator-in-Charge
