Border Patrol Inspections:

When stop is made to allow Border Patrol to inspect train, air brakes must be set and not released until person in charge of inspection has advised train is released and inspectors are clear. Uvalde:

All eastward trains will have Border Patrol inspection performed in the siding.

East Yard Radio Channel:

Crews performing work at East Yard must operate on Radio Channel 049-049.

Derail East End East Yard:

Instructions - Yard derail located at MP 206.5 normally lined for derailing position, is a power-operated, radio activated derail. Radio operation is made by use of Radio Channel 049-049.

Movement over the derail must be made as follows: 1. To operate derail with radio or walkie talkie on channel 059-059, press # 6 4 1 (pound, six, four, one). When derail lines for NON-Derailing track movement a verbal message stating the position of the derail will be announced.

2. Movement beyond the derail circuit causes the derail to restore to the derailing position. Reverse movements must not be made until these steps are repeated.

Note: If derail does not line for your movement after operation of radio, stop and inspect derail switch points. If obstruction is found, unlock the hand-pump, move switch to center upright position and clear points of obstruction.

Return switch pump handle to normal position and lock switch, and repeat radio sequence. If switch still does not line for main track movement, unlock the hand-pump and operate the derail by hand. If necessary to operate derail by hand, derail must be
