

## Online E6B Computer / E6B Emulator

E6BX E6B Simulator New

World's most popular E6B Calculator, aka CRP-5

### Heading, Ground Speed, & Wind Correction Angle

|                         |                                  |
|-------------------------|----------------------------------|
| Course :                | <input type="text" value="244"/> |
| True Air Speed :        | <input type="text" value="235"/> |
| Wind Direction :        | <input type="text" value="260"/> |
| Wind Speed :            | <input type="text" value="31"/>  |
| Wind Correction Angle : | <input type="text" value="2"/>   |
| Heading :               | <input type="text" value="246"/> |
| Ground Speed :          | <input type="text" value="205"/> |

### Flight Time for Distance & Ground Speed

|                |                                       |
|----------------|---------------------------------------|
| Distance :     | <input type="text" value="2"/>        |
| Ground Speed : | <input type="text" value="205"/>      |
| Flight Time :  | <input type="text" value="00:00:35"/> |

### Fuel Consumption for Flight Time

|                    |                                   |
|--------------------|-----------------------------------|
| Flight Time (min): | <input type="text" value="0.59"/> |
|--------------------|-----------------------------------|

### Illustration

|           |                                    |                                     |
|-----------|------------------------------------|-------------------------------------|
| Altitude: | <input type="text" value="12300"/> | ft <input type="button" value="v"/> |
|-----------|------------------------------------|-------------------------------------|

|               |                                  |                                  |
|---------------|----------------------------------|----------------------------------|
| Temp. Offset: | <input type="text" value="-11"/> | °C or K <input type="checkbox"/> |
|---------------|----------------------------------|----------------------------------|

Temperature: 252.781 K | -20.369 °C

Select one speed below to calculate the remaining.

|                      |                                      |                                      |                          |
|----------------------|--------------------------------------|--------------------------------------|--------------------------|
| Calibrated Airspeed: | <input type="text" value="200.204"/> | kts <input type="button" value="v"/> | <input type="checkbox"/> |
|----------------------|--------------------------------------|--------------------------------------|--------------------------|

|                      |                                     |                                      |                          |
|----------------------|-------------------------------------|--------------------------------------|--------------------------|
| Equivalent Airspeed: | <input type="text" value="198.91"/> | kts <input type="button" value="v"/> | <input type="checkbox"/> |
|----------------------|-------------------------------------|--------------------------------------|--------------------------|

|                |                                  |                                      |                                     |
|----------------|----------------------------------|--------------------------------------|-------------------------------------|
| True Airspeed: | <input type="text" value="235"/> | kts <input type="button" value="v"/> | <input checked="" type="checkbox"/> |
|----------------|----------------------------------|--------------------------------------|-------------------------------------|

|              |                                    |                          |
|--------------|------------------------------------|--------------------------|
| Mach Number: | <input type="text" value="0.379"/> | <input type="checkbox"/> |
|--------------|------------------------------------|--------------------------|
