Hello NTSB,

Leidos Flight Services and third party vendors utilizing the LFS system had no contact with N72EX on 1/25/20 or 1/26/2020.

Sincerely,

John T. Alexander | Leidos

Michael,

For recent airports there was only one applicable entry. We store an internal ID for those and it appears to map to KSUN in Idaho. I can't be certain, but that appears to be correct. That was the only airport viewed in the 10 days before that accident. That tells me he really did not use our app extensively.

As for recent routes, the newest ones were 2 from Jan 18:

- 32.736/-117.194 38.69315661819007/-121.5841345178412
- 33.71473631507246/-118.0661152438173 KRIV

No recent imagery viewed/saved in 2019 or 2020 at all. No plates viewed in the app in 2020. No flight objects, flight plans, or "formal" briefings ever created.

How's the progress coming on trying to extract data from the devices? Any luck or expectations of success?

Best,

-Jason Miller
