Subject: Plane crash on S Nolan River Rd. Cleburne

I went outside and heard an airplane, so I looked up to see if it was my neighbor. The plane didn't appear to be steady, it was very low to the ground, then it went perpendicular to the ground and I could tell it was going to crash. I lost line of sight for just a second or two and then I heard the crash. When I was talking to you, I said I didn't know if the engine was running but when I started to write this I remembered that's why I looked up because I heard the engine and I didn't hear it quit, I just heard it crash. That's everything I can tell you.

I don't know if anyone told you but his wife said he called her and said the engine was over heating so he put some oil in it.
