

NTSB RECORD OF CONVERSATION

Investigator name: Shaun Williams
Mode: Senior Aviation Accident Investigator
Region: Central

Date: June 14, 2021
Person Contacted: Jason Spangler
NTSB Accident Number: CEN21LA262

Narrative:

On June 10, 2021, about 2015 Central daylight time, a Cessna 150, N22658, sustained substantial damage when it was involved in an accident near Muncie, Indiana. Mr. Spangler was a witness to the accident.

He stated that the accident took place following departure from a grass yard that had been rolled and was about 1,200ft long. He knew the pilot had been flying in and out of the strip "a few times" before. On the day of the accident, it was too hot and humid for the underpowered Cessna 150. He said the engine "kept going," but there was not enough airspeed.

He saw the airplane takeoff and start a bank to the north to avoid trees. When 30-50ft above the ground, the airplane stalled, fell sideways from the sky and hit left wing first, the spun, the nose impacted the ground, followed by the right wing.
