Good Afternoon,

I am a Lifeline Medevac Pilot and today I witnessed the Lift Academy airplane crash in Darlington, Indiana.

We were at a Firefighter Training Event nearby at the baseball field. Heard an airplane and I looked up and witnessed the aircraft in direct nose down slow left spin and saw them disappear below tree line. Sounded like propeller was high before impact then immediately quiet upon impact. I would say I witnessed approx 4 seconds before impact.

If you need anything else please let me know how I can help.

Thanks again!

Daniel Hill
