DAILY TOPICS								
12/12/2017 Please do not sign off a can before you have actually preflighted the helicopter.								
12/15/2017 Please remember your thumb drives for the video system								
12/22/2017 Please remember to crack your pilot window after last flight. Vegas had a cracked windshield today.								
12/23/2017 Watch for slow blades when lifting or landing								
01/2/2018 Remember to call in Hobbs before you collect your passengers. Should be done during your preflight.								
01/4/2018 Particularly on the last flight of the day, pay attention to your pad assignments. It's vital we park aircraft correctly while the ramp is undergoing construction.								
01/7/2018 There will be a powerline patrol in a white M0530 starting 1/8/2018. Low Level Operations								
01/8/2018 New hire class starts today. Please keep briefing room clean and please be quiet for the classes if you're hanging out unsold or between flights								
01/8/2018 when crossing the river to QMB we should be below 2,000 feet.								
01/13/2018 You guys are awesome. We appreciate all the hard work you put in. Keep it up!!!								
01/13/2018 82 fuel loads are 40% One Way and 55% Round Trip. We have been having some over fuel issues lately.								
01/13/2018 Before you leave for the Dam, get tower to print you a full fuel manifest and zero fuel manifest so you do not have to call base for numbers.								
01/26/2018 No parking outside flight ops department, car or motorcycles - the mesquite tree is being killed.								
1/25/2018 Maintenance has assumed responsibility for the Rugged Video systems. Any problems need to be recorded in the aircrafts logbook.								
1/26/2018 If you have issues with park front seats or "questions" for tower or CSR's you can call them (or a lead) from the helicopter, no need to walk them in.								
1/29/2018 There will be 2 500's working from the substation to the approach end of 33 with 100ft lines at and below 2,400 ft for the next few days								
1/31/2018 Please remember the USB drives when flying 23, 30, 34, 42, 43								
1/31/2018 Please include the disgruntled passengers name when filling an incident report								
2/2/2018 Please don't overfly all the angry residents of Nelson when arriving and departing Eldorado. Fly down the wash and depart east of Neopolitan Peak.

01/13/2018 B2 fuel loads are 40% One Way and 55% Round Trip. We have been having some over fuel issues lately.													
01/13/2018 Before you leave for the Dam, get tower to print you a full fuel manifest and zero fuel manifest so you do not have to call base for numbers.													
01/26/2018 No parking outside flight ops department, car or motorcycles - the mesquite tree is being felled.													
1/25/2018 Maintenance has assumed responsibility for the Rugged Video systems. Any problems need to be recorded in the aircrafts logbook.													
1/26/2018 If you have issues with pas front seats or "Questions" for tower or CSR's you can call them (or a lead) from the helicopter, no need to walk them in													
1/29/2018 There will be 2 500's working from the substation to the approach end of 33 with 100ft lines at and below 2,400 ft for the next few days.													
1/31/2018 Please remember the USB drives when flying 23, 30, 34, 42, 43													
1/31/2018 Please include the disembarked passengers name when filling an incident report

01/4/2018 Particularly on the last flight of the day, pay attention to your pad assignments. It's vital we park aircraft correctly while the ramp is undergoing construction.																
01/7/2018 There will be a powerline patrol in a white MD530 starting 1/8/2018. Low Level Operations																
01/8/2018 New hire class starts today. Please keep briefing room clean and please be quiet for the classes if you're hanging out unsold or between flights																
01/8/2018 when crossing the river to QMB we should be below 2,000 feet.																
01/13/2018 You guys are awesome. We appreciate all the hard work you put in. Keep it up!!!																
01/13/2018 fuel loads are 40% One Way and 55% Round Trip. We have been having some over fuel issues lately.																
01/13/2018 Before you leave for the Dam, get tower to print you a full fuel manifest and zero fuel manifest so you do not have to call base for numbers.																
01/26/2018 No parking outside flight ops department, car or motorcycles - the mesquite tree is being felled.																
1/25/2018 Maintenance has assumed responsibility for the Rugged Video systems. Any problems need to be recorded in the aircrafts logbook.																
1/26/2018 If you have issues with pax front seats or "questions" for tower or CSRs you can call them (or a lead) from the helicopter, no need to walk them in.

12/12/2017 Please do not sign off a can before you have actually preflighted the helicopter.
 12/15/2017 Please remember your thumb drives for the video system.
 12/22/2017 Please remember to crack your pilot window after last flight. Vegas had a cracked windshield today.
 12/3/2017 Watch for slow blades when lifting or landing.
 01/2/2018 Remember to call in Hobbs before you collect your passengers. Should be done during your preflight.
 01/4/2018 Particularly on the last flight of the day, pay attention to your pad assignments. It's vital we park aircraft correctly while the ramp is undergoing construction.
 01/7/2018 There will be a powerline patrol in a white MD530 starting 1/8/2018. Low Level Operations.
 01/8/2018 New hire class starts today. Please keep briefing room clean and please be quiet for the classes if you're hanging out unsold or between flights.
 01/8/2018 When crossing the river to QMB we should be below 2,000 feet.
 01/13/2018 You guys are awesome. We appreciate all the hard work you put in. Keep it up!!!
 01/13/2018 B2 fuel loads are 40% One Way and 55% Round Trip. We have been having some over fuel issues lately.
 01/13/2018 Before you leave for the Dam, get tower to print you a full fuel manifest and zero fuel manifest so you do not have to call base for numbers.

TAF KLAS		AREA FORECAST													
201305Z 2013/2118 31010G18KT P6SM FEW050 SCT070 BKN100		SYNOPSIS: A low pressure system will move across the region today leading to wintry weather across Lincoln, Esmeralda, Nye and northern Mohave Counties. Snowfall will persist through today in Lincoln County and will lead to significant snow accumulations at elevations above 5000'. Other areas will see scattered rain showers and snow showers with light accumulations through this evening. A cold front will spread across the region today leading breezy north winds and much cooler temperatures through the remainder of the weekend. Dry conditions and gradually warming temperatures are expected through the week.

DAILY TOPICS															
12/12/2017 Please do not sign off a can before you have actually preflighted the helicopter.															
12/15/2017 Please remember your thumb drives for the video system.															
12/22/2017 Please remember to crack your pilot window after last flight. Vegas had a cracked windshield today.															
12/23/2017 Watch for slow blades when lifting or landing.															
01/2/2018 Remember to call in Hobbs before you collect your passengers. Should be done during your preflight.															
01/4/2018 Particularly on the last flight of the day, pay attention to your pad assignments. It's vital we park aircraft correctly while the ramp is undergoing construction.															
01/7/2018 There will be a powerline patrol in a white MD530 starting 1/8/2018. Low Level Operations.															
01/8/2018 New hire class starts today. Please keep briefing room clean and please be quiet for the classes if you're hanging out unsold or between flights.															
01/8/2018 When crossing the river to QMB we should be below 2,000 feet.															
01/13/2018 You guys are awesome. We appreciate all the hard work you put in. Keep it up!!															
01/13/2018B2 fuel loads are 40% One Way and 55% Round Trip. We have been having some over fuel issues lately.															
01/13/2018Before you leave for the Dam, get tower to print you a full fuel manifest and zero fuel manifest so you do not have to call base for numbers.															
1/17/2018 We have Copter 11 coming to do a game and fish survey on Thursday and Friday. He will be low level over Temple Bar and Lake Mead monitoring 120.65
