

Daniel Boggs
Air Safety Investigator
Eastern Region Aviation

Date: 10/31/23

Subject: ERA24FA026

Contact: Jerry Owings / Witness

Mr. Owings was interviewed in person.

Mr. Owings stated he was standing outside his house when he heard an airplane flying in the distance and stated the engine sounded like it was “oscillating.” He looked up and saw the airplane flying south and began to make a left circling turn and what looked like a white mist trailing the airplane. He further stated that the engine “cut out” and the airplane went “nose down” and impacted the ground.

Mrs. Owings was interviewed by telephone.

Mrs. Owings stated she was parking the car by the garage when she noticed her husband pointing to the sky. She looked out at the field and noticed an airplane flying level in a northwesterly direction and appeared to be “rolling.” She stated it made about 3-4 revolutions before going nose down and impacting the ground.
