SERVICE COMMENTS

- 03 **Repair Comment** #11 Rod bearing failed to meet cat spec, crank OK. Will need to replace ALL rod bearings in engine. Cat bearings were 85 days out, customer opted to use aftermarket IPD bearings. Waiting 2 weeks for bearing to show up. Removed oil cooler, starter, oil pump, prelube pump to access base doors. Replace all rod bearings with IPD, torquing all to spec.
- 04 **Repair Comment** R+R aftercooler. Remove turbo piping, air intake tract, replace aftercoolers with exchange. Reseal and install, torquing to spec. Fill with water and verify no leaks at this time.
- 06 **Repair Comment** LOTO engine, remove valve covers and breathers. Adjust overhead, valves and injectors to spec. All OK inside. Torque all lock nuts to spec and install valve covers and breathers.
Start engines and verify proper operation.
