The AT&T network constantly communicates with internet enabled devices when they are powered on. These communications will show as data usage on the customer records but do not necessarily indicate a customer initiated a transaction. AT&T does not retain records that can definitively show whether a transaction was customer initiated or AT&T's network initiated the data transaction.

The AT&T network constantly communicates with internet enabled devices
when they are powered on. These communications will show as data usage on the
customer records but do not necessarily indicate a customer initiated a transaction.
AT&T does not retain records that can definitively show whether a transaction was
customer initiated or AT&T's network initiated the data transaction.

The AT&T network constantly communicates with internet enabled devices when they are powered on. These communications will show as data usage on the customer records but do not necessarily indicate a customer initiated a transaction. AT&T does not retain records that can definitively show whether a transaction was customer initiated or AT&T's network initiated the data transaction.

The AT&T network constantly communicates with internet enabled devices
when they are powered on. These communications will show as data usage on the
customer records but do not necessarily indicate a customer initiated a transaction.
AT&T does not retain records that can definitively show whether a transaction was
customer initiated or AT&T's network initiated the data transaction.

The AT&T network constantly communicates with internet enabled devices
when they are powered on. These communications will show as data usage on the
customer records but do not necessarily indicate a customer initiated a transaction.
AT&T does not retain records that can definitively show whether a transaction was
customer initiated or AT&T's network initiated the data transaction.
