Races	<b>Asian or Pacific Islander</b>			
<b>Payment</b>				
ALS Assessment	<b>No</b>			

**Narrative**

R42 responded to an MVC car vs semi tractor trailer and found a Tesla sedan that was in the grassy middle median. The roof of he car was ripped off and a 50ish y/o male was sitting in the driver's seat with a partial decapitation. Blood and brain matter was splattered across the back seat. Patient had obvious injuries incompatible to life, Patient was called signal 7. No ID was found around patient, license plate number [REDACTED]. Patient was covered with yellow tarp. Approximately a half mile north on 441 the semi had brain matter found around it. Scene TOT PBSO.

## Narrative

L47 arrived at the scene of a MVC involving a semi truck and a Tesla car. L47 parked in front of the semi and instructed to shut down traffic to the scene along with assistance from PBSO. Assisted R54 with investigation of the scene. Upon arrival of VHI L47 was cleared from the scene as they would remain and take over the scene.

Additional remarks by CO Faso...When L47 arrived on scene, traffic control was needed. During inspection of debris field, we noted brain matter and vehicle debris in the roadway prompting immediate closure of all SB lanes of SR7/441. Debris and brain matter were not disturbed so VHI and PBSO could see items for accident investigation. L47 crew checked the grassy median and swale area for additional car debris and/or body parts. Did not find anything additional or obvious walking southbound due to the thick grass. All crash scene items were left untouched. Verbal report of our actions giving to first arriving PBSO SRGT and LT. VHI arrived and cleared L47 for movement away from scene.....AF13609
