

Configuration	Main Deck	Forward	Aft	Bulk	Total (All Compartments)	With Animals
Forward Cargo A/C - ON, Lower Aft Cargo A/C - ON						
MD-11						
3 or 2 Packs - Econ ON	2726 kg	1089 kg	692 kg	147 kg	4654 kg	N/A

NOTES:

- 1 \$ Any time dry ice is carried in the 767 lower forward cargo compartment or the 777 lower forward and/or aft cargo compartments, the respective lower cargo air conditioning (forward and/or aft) **must** be on. A statement prints on the DG Manifest as a reminder.
- 2 @ Consider Fuel Overburn (if applicable):
 - a 777 Lower Forward Cargo A/C - ON = 0.4%
 - b 777 Lower Aft Cargo A/C - ON = 0.4%
 - c 777 Lower Forward and Aft Cargo A/C - ON = 0.8%
- 3 # Not applicable to N850FD - N857FD: no dry ice is allowed in the lower aft cargo compartment due to no ACAC installed.

(e) Dry Ice Dispatch Limitations (Feeder Aircraft)

WARNING:

When an aircraft is carrying dry ice, the loading crew must be alerted so that ventilation safety procedures are followed.

Table 5-1-6: Dry Ice Dispatch Limitations (Feeder Aircraft)

Aircraft Type	Cabin			POD	Wing/ Noselocker
	Non-Pressurized	2 Pack	1 Pack		
C-208-B	*76 kg	N/A	N/A	Unlimited	N/A

Aircraft Type	Cabin			POD	Wing/ Noselocker
	Non-Pressurized	2 Pack	1 Pack		
ATR 42	N/A	*333 kg	*126 kg	N/A	N/A
ATR 72	N/A	*458 kg	*203 kg	N/A	N/A
Supplemental/ Aircraft	*See Note	* See Note	See Note	* See Note	* See Note

Notes are relevant to all fields shown with an asterisk (*).

NOTES:

- 1 Before loading, Ramp personnel must verify the dry ice capacity of any feeder aircraft with the Pilot-in-Command.
- 2 Any deviation from the requirements for feeder aircraft must be approved by the operator. Feeder aircraft are loaded with dry ice as directed by the flight crew.

I. Animal (Lives) Loading

NOTE:

Insects, non-venomous reptiles (i.e., snakes, alligators, lizards), pet store tropical fish and consumable shellfish (i.e., lobsters, scallops, etc.) are not considered live animals for air carriage purposes, in compliance with [Aircraft Ramp Operations Manual](#) R3-5-75 and R5-5-25.

- (1) Never load a USPS shipment of live animals in closed ULD containers.
- (2) Dry ice or Cryogenic Liquids and animals (Lives) must be loaded on aircraft as follows:
 - (a) Lives must be loaded forward of dry ice or cryogenic liquid shipments.
 - (b) Lives must be separated from dry ice shipments or cryogenic liquid shipments by at least 1 position and live animals in packages must be placed 12 inches off the floor.
 - (c) Except for dry ice packed with other dangerous goods that are required to be accessible, all dry ice shall be loaded aft.
 - (d) Never load lives and dry ice or cryogenic liquids together on the same pallet.
 - (e) Never load lives and dry ice or cryogenic liquids together in bulk compartments.
- (3) Special Rules For 777F:
 - (a) Live animals cannot be loaded in the AFT BELLY or ABK of tail numbers 850-857.
