

# **Aviation Investigation Final Report**

**Location**: Block Island, Rhode Island **Accident Number**: GAA18CA021

Date & Time: October 1, 2017, 12:30 Local Registration: N1054S

Aircraft: Piper PA32R Aircraft Damage: Destroyed

**Defining Event:** Loss of control on ground **Injuries:** 2 Minor

Flight Conducted Under: Part 91: General aviation - Personal

#### **Analysis**

The pilot reported that, during landing, the airplane touched down about "150 ft. beyond [the runway] numbers" and he immediately "removed flaps and applied brakes." He added that he was "unable to stop the forward momentum of the plane," and he believed he was going to overrun the runway, so he applied full power to go-around. Subsequently, the airplane overran the runway before a climb rate could be established, and during the runway excursion, the airplane struck a chain link fence. During the impact, the right wing separated from the fuselage, and the airplane rolled inverted down a ravine before coming to a stop on the main landing gear. The pilot further reported that, after the accident, he believed he came in "too fast" for landing.

The airplane sustained substantial damage to the fuselage, empennage, and both wings.

The pilot reported that there were no preaccident mechanical malfunctions or failures with the airplane that would have precluded normal operation.

#### **Probable Cause and Findings**

The National Transportation Safety Board determines the probable cause(s) of this accident to be:

The pilot's use of an incorrect airspeed during landing, which resulted in a runway overrun.

## Findings

Personnel issues Aircraft control - Pilot

Aircraft Airspeed - Incorrect use/operation

Aircraft Landing distance - Not attained/maintained

Environmental issues Fence/fence post - Contributed to outcome

### **Factual Information**

### **History of Flight**

Landing	Landing area undershoot
Landing-landing roll	Loss of control on ground (Defining event)
Landing-aborted after touchdown	Runway excursion
Landing-aborted after touchdown	Collision with terr/obj (non-CFIT)
Landing	Roll over

#### **Pilot Information**

Certificate:	Private	Age:	64,Male
Airplane Rating(s):	Single-engine land	Seat Occupied:	Left
Other Aircraft Rating(s):	None	Restraint Used:	3-point
Instrument Rating(s):	None	Second Pilot Present:	No
Instructor Rating(s):	None	Toxicology Performed:	No
Medical Certification:	Class 3 With waivers/limitations	Last FAA Medical Exam:	June 11, 2016
Occupational Pilot:	No	Last Flight Review or Equivalent:	August 29, 2016
Flight Time:	(Estimated) 358 hours (Total, all aircraft), 34 hours (Total, this make and model), 55 hours (Pilot In Command, all aircraft), 23 hours (Last 90 days, all aircraft), 9 hours (Last 30 days, all aircraft)

### **Aircraft and Owner/Operator Information**

Aircraft Make:	Piper	Registration:	N1054S
Model/Series:	PA32R 301T	Aircraft Category:	Airplane
Year of Manufacture:	2007	Amateur Built:	
Airworthiness Certificate:	Normal	Serial Number:	3257448
Landing Gear Type:	Retractable - Tricycle	Seats:	6
Date/Type of Last Inspection:	January 10, 2017 Annual	Certified Max Gross Wt.:	3600 lbs
Time Since Last Inspection:		Engines:	1 Reciprocating
Airframe Total Time:	2215 Hrs as of last inspection	Engine Manufacturer:	Lycoming
ELT:	C91 installed	Engine Model/Series:	TIO-540-HIA
Registered Owner:	On file	Rated Power:	300 Horsepower
Operator:	On file	Operating Certificate(s) Held:	None

### Meteorological Information and Flight Plan

Conditions at Accident Site:	Visual (VMC)	Condition of Light:	Day
Observation Facility, Elevation:	KBID,107 ft msl	Distance from Accident Site:	0 Nautical Miles
Observation Time:	16:56 Local	Direction from Accident Site:	0°
<b>Lowest Cloud Condition:</b>	Clear	Visibility	10 miles
Lowest Ceiling:	None	Visibility (RVR):	
Wind Speed/Gusts:	3 knots /	Turbulence Type Forecast/Actual:	/ None
Wind Direction:		Turbulence Severity Forecast/Actual:	/ N/A
Altimeter Setting:	30.35 inches Hg	Temperature/Dew Point:	16°C / 6°C
Precipitation and Obscuration:	No Obscuration; No Precipitation		
Departure Point:	SUSSEX, NJ (FWN)	Type of Flight Plan Filed:	VFR
Destination:	Block Island, RI (BID )	Type of Clearance:	VFR
Departure Time:	11:30 Local	Type of Airspace:	Class G

## **Airport Information**

Airport:	BLOCK ISLAND STATE BID	Runway Surface Type:	Asphalt
Airport Elevation:	107 ft msl	<b>Runway Surface Condition:</b>	Dry
Runway Used:	28	IFR Approach:	None
Runway Length/Width:	2502 ft / 100 ft	VFR Approach/Landing:	Full stop;Go around;Traffic pattern

### Wreckage and Impact Information

Crew Injuries:	1 Minor	Aircraft Damage:	Destroyed
Passenger Injuries:	1 Minor	Aircraft Fire:	None
Ground Injuries:	N/A	Aircraft Explosion:	None
Total Injuries:	2 Minor	Latitude, Longitude:	41.167499,-71.584999(est)

#### **Administrative Information**

Investigator In Charge (IIC):	Gerhardt, Adam
Additional Participating Persons:	Craig Souza; FAA/ FSDO; Boston, MA
Original Publish Date:	February 21, 2018
Last Revision Date:	
Investigation Class:	<u>Class</u>
Note:	This accident report documents the factual circumstances of this accident as described to the NTSB.
Investigation Docket:	https://data.ntsb.gov/Docket?ProjectID=96235

The National Transportation Safety Board (NTSB) is an independent federal agency charged by Congress with investigating every civil aviation accident in the United States and significant events in other modes of transportation—railroad, transit, highway, marine, pipeline, and commercial space. We determine the probable causes of the accidents and events we investigate, and issue safety recommendations aimed at preventing future occurrences. In addition, we conduct transportation safety research studies and offer information and other assistance to family members and survivors for each accident or event we investigate. We also serve as the appellate authority for enforcement actions involving aviation and mariner certificates issued by the Federal Aviation Administration (FAA) and US Coast Guard, and we adjudicate appeals of civil penalty actions taken by the FAA.

The NTSB does not assign fault or blame for an accident or incident; rather, as specified by NTSB regulation, "accident/incident investigations are fact-finding proceedings with no formal issues and no adverse parties ... and are not conducted for the purpose of determining the rights or liabilities of any person" (Title 49 Code of Federal Regulations section 831.4). Assignment of fault or legal liability is not relevant to the NTSB's statutory mission to improve transportation safety by investigating accidents and incidents and issuing safety recommendations. In addition, statutory language prohibits the admission into evidence or use of any part of an NTSB report related to an accident in a civil action for damages resulting from a matter mentioned in the report (Title 49 United States Code section 1154(b)). A factual report that may be admissible under 49 United States Code section 1154(b) is available here.
