

Aviation Investigation Final Report

Location: Hudson, New York Accident Number: GAA18CA420

Date & Time: June 29, 2018, 21:45 Local Registration: N615EM

Aircraft: Cirrus SR22 Aircraft Damage: Substantial

Defining Event: Wildlife encounter (non-bird) **Injuries:** 2 None

Flight Conducted Under: Part 91: General aviation - Personal

Analysis

According to the pilot, following a night visual flight rules cross-country flight, he overflew the destination airport at 1,500 ft above ground level and set up a normal approach. Just before touchdown, he saw a deer walk onto the runway from the right and collide with the left main landing gear, which then separated from the airplane. As the airplane settled, the left wing struck the runway, and the airplane veered left. The airplane exited the left side of the runway and collided with a drainage culvert.

The airplane sustained substantial damage the left wing spar and the left main landing gear attachment points.

The airport facility directory did not contain a note to caution that deer were in the vicinity of the airport.

The pilot reported that there were no mechanical malfunctions or failures with the airplane that would have precluded normal operation.

Probable Cause and Findings

The National Transportation Safety Board determines the probable cause(s) of this accident to be:

Collision with a deer during landing.

Findings

Environmental issues Animal(s)/bird(s) - Effect on operation

Aircraft Directional control - Attain/maintain not possible

Environmental issues (general) - Contributed to outcome

Factual Information

History of Flight

Landing-flare/touchdown	Wildlife encounter (non-bird) (Defining event)	
Landing-landing roll	Loss of control on ground	
Landing-landing roll	Collision with terr/obj (non-CFIT)	
Landing-landing roll	Part(s) separation from AC	
Landing-landing roll	Runway excursion	

Pilot Information

Certificate:	Private	Age:	31,Male
Airplane Rating(s):	Single-engine land	Seat Occupied:	Left
Other Aircraft Rating(s):	None	Restraint Used:	4-point
Instrument Rating(s):	Airplane	Second Pilot Present:	No
Instructor Rating(s):	None	Toxicology Performed:	No
Medical Certification:	Class 3 Without waivers/limitations	Last FAA Medical Exam:	August 4, 2016
Occupational Pilot:	No	Last Flight Review or Equivalent:	January 20, 2018
Flight Time:	(Estimated) 680.2 hours (Total, all aircraft), 113.8 hours (Total, this make and model), 633.2 hours (Pilot In Command, all aircraft), 53.4 hours (Last 90 days, all aircraft), 14.5 hours (Last 30 days, all aircraft), 1.8 hours (Last 24 hours, all aircraft)

Aircraft and Owner/Operator Information

Aircraft Make:	Cirrus	Registration:	N615EM
Model/Series:	SR22 No Series	Aircraft Category:	Airplane
Year of Manufacture:	2010	Amateur Built:	
Airworthiness Certificate:	Normal	Serial Number:	3682
Landing Gear Type:	Tricycle	Seats:	4
Date/Type of Last Inspection:	January 16, 2018 Annual	Certified Max Gross Wt.:	3400 lbs
Time Since Last Inspection:		Engines:	1 Reciprocating
Airframe Total Time:	880 Hrs at time of accident	Engine Manufacturer:	Continental
ELT:	C126 installed, not activated	Engine Model/Series:	IO-550-N
Registered Owner:	Ginther Associates LLC	Rated Power:	310 Horsepower
Operator:	Ginther Associates LLC	Operating Certificate(s) Held:	None

Meteorological Information and Flight Plan

Conditions at Accident Site:	Visual (VMC)	Condition of Light:	Night
Observation Facility, Elevation:	KDDH,826 ft msl	Distance from Accident Site:	41 Nautical Miles
Observation Time:		Direction from Accident Site:	29°
Lowest Cloud Condition:		Visibility	10 miles
Lowest Ceiling:		Visibility (RVR):	
Wind Speed/Gusts:	/	Turbulence Type Forecast/Actual:	/
Wind Direction:		Turbulence Severity Forecast/Actual:	/
Altimeter Setting:	29.96 inches Hg	Temperature/Dew Point:	22°C / 18°C
Precipitation and Obscuration:			
Departure Point:	College Park, MD (CGS)	Type of Flight Plan Filed:	VFR
Destination:	Hudson, NE (1B1)	Type of Clearance:	VFR;IFR
Departure Time:	20:03 Local	Type of Airspace:	Class G

Airport Information

Airport:	Columbia County 1B1	Runway Surface Type:	Asphalt
Airport Elevation:	198 ft msl	Runway Surface Condition:	Dry
Runway Used:	21	IFR Approach:	None
Runway Length/Width:	5350 ft / 100 ft	VFR Approach/Landing:	Full stop;Traffic pattern

Wreckage and Impact Information

Crew Injuries:	1 None	Aircraft Damage:	Substantial
Passenger Injuries:	1 None	Aircraft Fire:	None
Ground Injuries:	N/A	Aircraft Explosion:	None
Total Injuries:	2 None	Latitude, Longitude:	42.291389,-73.710281(est)

Administrative Information

Investigator In Charge (IIC):	Hicks, Michael
Additional Participating Persons:	Todd P Moses; FAA; Albany, NY
Original Publish Date:	March 18, 2019
Last Revision Date:	
Investigation Class:	<u>Class</u>
Note:	This accident report documents the factual circumstances of this accident as described to the NTSB.
Investigation Docket:	https://data.ntsb.gov/Docket?ProjectID=97759

The National Transportation Safety Board (NTSB) is an independent federal agency charged by Congress with investigating every civil aviation accident in the United States and significant events in other modes of transportation—railroad, transit, highway, marine, pipeline, and commercial space. We determine the probable causes of the accidents and events we investigate, and issue safety recommendations aimed at preventing future occurrences. In addition, we conduct transportation safety research studies and offer information and other assistance to family members and survivors for each accident or event we investigate. We also serve as the appellate authority for enforcement actions involving aviation and mariner certificates issued by the Federal Aviation Administration (FAA) and US Coast Guard, and we adjudicate appeals of civil penalty actions taken by the FAA.

The NTSB does not assign fault or blame for an accident or incident; rather, as specified by NTSB regulation, "accident/incident investigations are fact-finding proceedings with no formal issues and no adverse parties ... and are not conducted for the purpose of determining the rights or liabilities of any person" (Title 49 Code of Federal Regulations section 831.4). Assignment of fault or legal liability is not relevant to the NTSB's statutory mission to improve transportation safety by investigating accidents and incidents and issuing safety recommendations. In addition, statutory language prohibits the admission into evidence or use of any part of an NTSB report related to an accident in a civil action for damages resulting from a matter mentioned in the report (Title 49 United States Code section 1154(b)). A factual report that may be admissible under 49 United States Code section 1154(b) is available here.
